Deep Learning Techniques for Side Channel Analysis

Nimar Blume

Abstract—Put the abstract here. The abstract should be 200-300 words long and must answer the following questions:

- **Why is this topic important and interesting?**
- **What is the topic?**

It's a good writing style to answer the "why" question first by putting the topic in a broader context.

I. INTRODUCTION

In general a scientific paper starts with an introduction to the topic.

II. STATE OF THE ART

In this section an analysis of the available literature on the topic is done. This section may be split or subdivided into several sections or subsections.

A. Subsection Heading Here

Subsection text here.

1) Subsubsection Heading Here: Subsubsection text here.

III. PLEASE NOTE

Regular research papers need at least two additional sections here. One section for contributions and methods and one section for the results. For seminar papers these sections can be omitted.

IV. CONCLUSION

Put the conclusions of the work here. The conclusion is like the abstract with an additional discussion of open points.
